

NOVA Test Document

This is a sample PDF created for testing NOVA's file reading feature.

About Pratham:

Pratham is a 19-year-old student from Haveri, Karnataka, India. He recently completed his 12th grade with PCMB (Physics, Chemistry, Maths, Biology) subjects. He is planning to pursue B.Tech in Computer Science Engineering.

About NOVA:

NOVA is a personal AI assistant built by Pratham using Python, Flask, and the Groq API. It features voice replies, conversation memory, real-time web search, and now PDF reading capability.

Fun Fact:

The capital of Karnataka is Bengaluru, which is also known as India's Silicon Valley due to its large number of technology companies.

Test Question Ideas:

1. What subjects did Pratham study in 12th grade?
2. What is NOVA built with?
3. What is the capital of Karnataka?
